

A world-class group

ANVA^{AV}

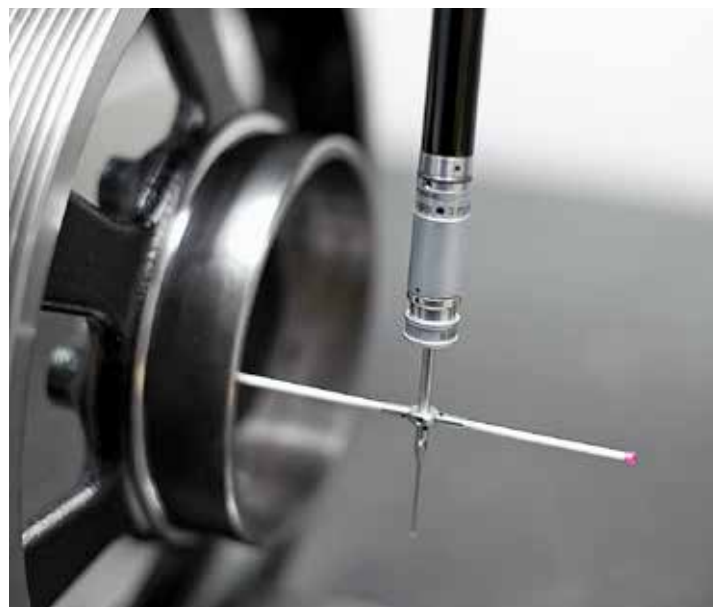

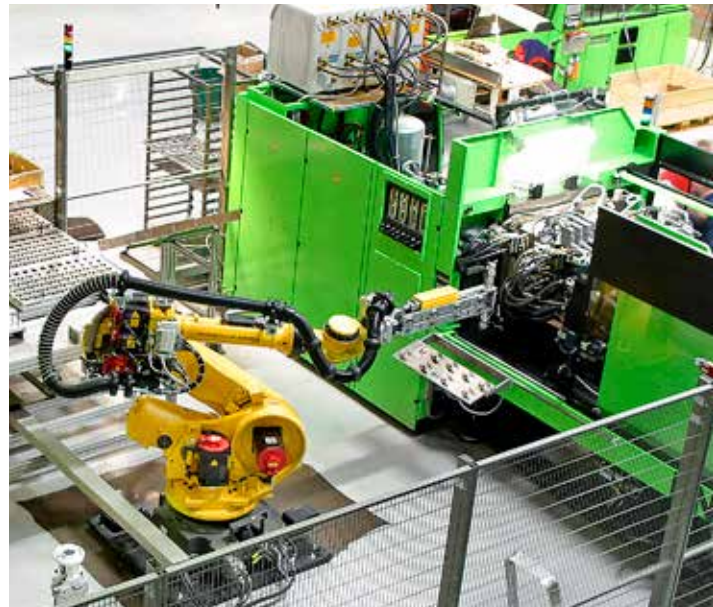

A world-class group!

AnVa ensures its customers' competitiveness thanks to a reliable supply of high-quality components. With total sales exceeding SEK 400 million and around 250 employees, we have the might to offer complete end-to-end solutions and niche specialist expertise – from little to large.

We strive to maintain a world-class level of service in our business areas, and are a national and global supplier to demanding customers in the automotive, mining, forestry, horticultural, and engineering industries.

Our quality is measured through our customers' satisfaction. We focus heavily on our dedicated employees who are passionate about the business and whose core interest is our customers' needs and circumstances.

AnVa works actively to ensure a high level of quality and environmental compliance, and is certified according to international standards. This ensures that our customers receive good quality products and services, inside and out.

- ISO/TS 16949
- ISO 14001

Moulded elastomers for challenging environments

AnVa Polytech is an experienced and reliable partner in the development and manufacturing of products made of rubber, silicone and TPE and combinations with plastic and metal.

Our strength is our devoted customer service, technical know-how and focus on sustainable applications. We support our customers from an early idea all the way to delivery of service or assembled product.

The majority of our products are designed for wide temperature ranges, gasses, fuels, liquids and other challenging environments. Our material lab develops customized materials based on customer specifications and the environment of the final application.

We have production facilities in Sweden, Lithuania and China.

EXPERTISE:

- material and product development
- environmental rubber
- tool manufacturing
- automation
- laser de-flashing
- vision

World-leading tubes and complete responsibility from raw material to finished product

AnVa Tubes & Components assists in choosing materials, and supplies and cuts special pipes and rod materials from world-leading suppliers for demanding world-leading industrial customers. We also provide effective logistics expertise.

Using our tubing and rods as a foundation, we have developed an efficient, highly automated machining workshop that supplies the most demanding and successful industrial customers. We also process castings and work together with efficient foundries. We are driven to supply products both on time and which fully meet our customers' needs.

We maintain total responsibility from raw material to finished product. Thanks to our broad network of manufacturers, we ensure that our customers' special requirements and requests are always met.

EXPERTISE:

- materials
- storage
- cutting
- machining
- heat treatment
- blasting
- tumbling
- surface treatment
- assembly/packaging
- automation

AnVa ensures its customers' competitiveness thanks to a reliable supply of high-quality components. We can offer complete end-to-end solutions and niche specialist expertise, all based on our customers' specific circumstances and needs.
